

THE COMPANY'S COMMITMENT

Within a complicated environment, a divided world with multiple risks, Coverpla's resilience, capacity for innovation, and dynamism, must be cultivated.

Our Quality Management System and CSR approach, support our global strategy and contribute to the long-term future of our company.

In line with our core values of **Humanity, High Standards, Trust, and Audacity**, we have set ourselves the following commitments to ensure our development, to promote continuous improvement and to force us increasing our performance, knowledge and expertise:

- **Satisfied customers**, able to quote our **brand**, and an **ecosystem of high-performance partners**, selected over the long term, to participate in the creation of shared values such as **Made in Europe**;
- **A global presence, expanded markets and customer base** to drive significant but measured business performance at a satisfactory level of profitability;
- **A global offer** with a focus on **sustainable development and in-depth expertise** (consultancy, design, 3D, standard supplies, co-production of customised items, storage, manufacturing and delivery) to support our customers and bring their creative projects to fruition;
- **A team enriched by new talents**, benefiting from skills and values passed on by our seniors. Experienced and fulfilled, they evolve with agility in a climate of trust, fluidity and openness;
- Setting up a **regulatory and environmental watch unit**.

The success of our Policy should not be the prerogative of a few, and the success of our commitments is everyone's business. Together, we are shaping our future.

We are committed to providing the human, technical and organisational resources to enable everyone to flourish in this process of continuous progress.
